Meeting Summary and Summary of Commitments and Agreements  
100-HR-1/100-HR-3/100-DR-1 Operable Unit Managers Meeting  
450 Hills Street, Room 47  
August 16, 1990

Meeting Summary/Summary of Commitments and Agreements

1. DR-1 Workplan final comment resolutions were discussed.
2. The reactor EISA will be given to DOE-RL by PNL, next week. The EIS will then be <sup>Addendum</sup> ~~transmitted~~ <sup>transmitted</sup> to DOE-HQ <sup>for review and</sup> ~~reviewed~~ <sup>approved</sup>, then ~~published~~ <sup>announced</sup> in the Federal Register. ~~for a 30-day comment period~~. The preferred remedy is ~~delayed~~ <sup>RL alternative</sup> one piece removal of the reactor block. JH
4. New procedures for QA oversight *must* be approved by EPA and Ecology prior to work plan approval.

Action #HR1.24: Check into reviewing the QA document to be issued to EPA and Ecology. Action: J. D. Goodenough

5. Ecology requested that the workplans be translated from Wordperfect 4.2 to 5.1 or 5.0. All three workplans will be given to Ecology on September 17 or 30 days after the resolution of comments on DR-1 (WHC).
6. EPA suggested key operable units be used to develop the streamlining strategy. The problem with using the observational approach is that there is no historical data at these three units. Ecology sees a problem of integrating the streamlining strategy and the observational approach. Larry Goldstein believes the draft HR-3 workplan appears flexible enough to incorporate aspects of the new streamlining strategy.
7. \$3.8 million is available in FY91 for the three operable units. Ecology: the budget problems are independent of the streamlining process and the observational approach. Schedules are now being prepared to conform with the 5-year plan although this is unrealistic because the Bush Budget does not support the 5-year plan [Ecology and EPA want this to be done]\*. Ecology is waiting for a formal letter indicating that the milestones in the TPA cannot be met due to the new FY91 budget (Bush Budget). WHC proposed using the \$3.8 million to begin nonintrusive work until additional funds become available. Ecology might support this general concept but final approval must await a formal request

\* Proposed for deletion.
